## A new appearance, day by day, year by year.

It's impossible not to admire and enjoy the incredible shape, smell, the depth of colors of the plants and trees that surround us. Defined by weather conditions and circumstances, plants always choose their most favorable path to grow.

With **Fernhurst** we borrow this rich and uncopiable design by nature, giving it a friendly arched framework to branch upon. Reminiscent to rose bows its ready to be overgrown by leaves, branches and flowers.

With its integrated pot, **Fernhurst Floorlamp** brings a touch of green to any space, indoors- or outdoors.

## Made to last.

**Fernhurst floorlamp** is made out of stainless steel and aluminium, covered with powder coating. Its concrete base with integrated planter allows for indoor- or outdoor use, as the waterdrain can be closed with the included plug.

For windy environments the base has 2 provisional holes for anchoring.

**Fernhurst** is equipped with a waterproof IP65 E27 cord set of 3 meters & light source. Customized length cord set upon request.

**Fernhurst** is made in the Netherlands.

A structure ready to be  
overgrown by leaves,  
branches and flowers.

## The Designer

Already during his study industrial design Bart Schilder was drawn into design furniture and lighting. When he started his career with the design brand Moooi in 2004, he soon became responsible for the design and development of products, working closely alongside company founders Casper Vissers and Marcel Wanders.

After 15 years Bart founded his design studio where he got drawn to the work of Casper and Suzy Visser's new brand Revised. A revised relationship was born.

R

# REVISED

Our aim with the label Revised is to create calming interiors with timeless atmospheres. With our modern interpretation of 20`s century craft, we bring an uncompromised level of detailing and sophistication to present-day interiors.

Every day we seek to capture enduring beauty, warmth, and craftsmanship and revise them into designs heirlooms that last for generations.
